## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3711

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lewark in view of Eggiman et al. (Eggiman). Lewark discloses the claimed method with the exception of the use of a compression wrap during the curing process. However, as disclosed by Eggiman such a step is known in the art when curing composite bats. It would have been obvious to have used such a step in curing Lewark's bat as well to help securely affix Lewark's composite layer.

Regarding claims 14 and 15, Eggiman does not specify the type of shrink tape used but cellophane shrink tape is commonly known and used for such applications and it would have been obvious to one of ordinary skill in the art to have used such for the Lewark/Eggiman bat if such were the most readily available.

In response to applicant's arguments, the purpose of the shrink tape is to constrict the composite layer(s) against the mandrel during curing. In Lewark the bat handle itself becomes the mandrel. The fact that the bat handle is not removed after the curing process is not relevant to what would have been obvious to the ordinarily skilled artisan concerned with the curing process itself. The point in both instances is to properly cure the composite layers in a secure and even fashion. As the prior art shows, the well known technique of using shrink tape is known in the bat art when curing composite layers on a mandrel and would obviously have been applicable to curing Lewark's composite layer to keep it smooth and even against the mandrel/bat handle.

Applicant's arguments filed 8/8/03 have been fully considered but they are not persuasive.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Mark S. Graham at telephone number 703-308-1355.
